

FIXED MOBILE CONVERGENCE

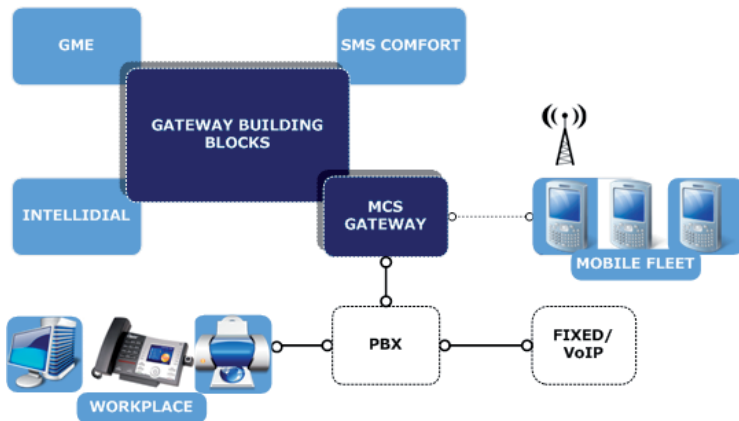

Next generation business GSM use

STANDARD MCS GATEWAY FOR LOWERING COSTS

More mobility, flexibility & cost reducing innovations are at the forefront of gaining a competitive advantage. Integrating your GSM with your telephone switch maximises the communication efficiency of your employees. This in essence providing you with a clear cut advantage in managing with the highly demanding business environment of today. The standard MCS GSM Gateway offers a considerable cost saving opportunity for dialling fixed to mobile and mobile to fixed. In most countries, firms are momentarily paying 10 eurocent/mins. With an MCS GSM Gateway, you will pay approximately 1.5 eurocent/ mins.

MCS "BUILDING BLOCKS"

The benefits of the MCS GSM Gateway can be expanded upon by adding MCS 'building blocks'. These integrated fixed/mobile convergence solutions will provide you with more GSM functionality, high savings and ultimately a more effective organization.

GET MORE WITH MCS 'BUILDING BLOCKS'

INTELLIDIAL

With IntelliDial, you will be able to access all your business contact numbers from your PC or mobile phone, anytime & anywhere. You will dial via your PBX and therefore also benefit from substantial cost savings with regard to business telecommunication. The application works with or without a telephone switch, is operator independent and works on all mobile phones.

GME: GSM MOBILITY EXTENDER

With GSM Mobile Extension you will have the opportunity to put calls on hold, set up a second call, swap calls and transfer the call to one of your colleagues. GSM Mobile Extender is a real DECT alternative solution.

SMS COMFORT

With SMS comfort, you will be able to send and receive SMS from and to your existing email programme. The Plug & Play solution allows you to substantially reduce your GSM SMS costs and add more functionality to your business telecommunication system.
